

# What is Focus40?

## A 25-year investment plan to position the MBTA to meet the needs of the Greater Boston region in 2040.

While the MBTA focuses every day on improving service for today's customer, the evolving and dynamic nature of the region it serves argues for a long-term vision as well. Focus40 is developing a long-term investment vision that recognizes both today's infrastructure challenges and the shifting demographics, changing climate, and evolving technology that may collectively alter the role the MBTA will play in the Greater Boston of the future.

- Focus40 will:
- Conduct an extensive public engagement process
- Prioritize long-term performance/reliability and capacity investments
- Solicit new ideas for system improvement and expansion
- Strengthen municipal partnerships for improved transit on our region's streets
