

Focus40 Goals

Performance and Reliability

- The MBTA will prioritize fixing and upgrading existing assets with investments that have the greatest reliability benefits to riders and in a manner that follows best practices for maintaining, preserving, and modernizing assets.

Support Economic Growth

- The MBTA will invest in upgrades along corridors either currently experiencing, or projected to experience, capacity constraints.
- The MBTA will recognize the polycentric nature of Boston's CBD and focus investments to increase access to areas, such as Logan Airport, the Seaport District, Kendall Square, and the Longwood Medical Area.
- The MBTA will focus expansion and increased frequency in areas with transit supportive land use and where municipalities prioritize transit on city streets.

Support Inclusive Growth

- The MBTA will work with communities to tie transit investments to affordable housing.
- The MBTA will strive to ensure transit connectivity for low-income communities is relatively equal to connectivity for communities overall.

Climate Change Mitigation and Adaptation

- The MBTA will minimize its greenhouse gas emissions by focusing on energy conservation, utilizing renewable energy sources, investing further in fuel-efficient vehicles, developing efficient service delivery plans, and promoting mode shift.
- The MBTA will make resiliency investments with a focus on elements of the system that serve the greatest number of riders and that are the most vulnerable to extreme heat and flooding.

Seamless Multimodal Experience

- The MBTA will invest in systems to promote seamless payment, multimodal route planning, and integration with other transportation technologies and providers, while ensuring equity of access and ability to meet demand.
